

## Allergen, Goose Feathers (e70) IgE

Test ID: 2661

CPT: 86003

### Clinical Significance

Latin name: Anser anser

Source material: Feathers and serum proteins

Family: Anatidae

Common names: Goose, Toulouse Goose, Grey Goose, Greylag

The genera Anser and Branta should both be considered. Anser includes many wild Geese with well-known domestic relatives. This group includes Anser anser (European) and species of Africa and Asia. Branta includes wild Geese like the Canada Goose (Branta Canadensis) and the Brants (most notably Branta bernicla).

Direct or indirect contact with bird allergens may cause sensitization. Bird allergens may be major components of house dust.

### Test Details

#### Components:

**Methodology:** Immunoassay (IA)

### Reference Range

< 0.35 KU/L<sup>TM</sup>

### Container

Serum Separator Tube (SST)

### Transport Temperature

Refrigerated

### Specimen(s)

Serum

### Specimen Stability

Refrigerated: 7 days

Frozen: 30 days

### Reject Criteria

### Days Performed

Mon-Sat

### Collection Instructions

Separate serum from cells within 45 minutes of venipuncture.
