

Allergen, Pork, (f26) IgE

Test ID: 3032

CPT: 86003

Clinical Significance

Latin name: Sus spp.

Source material: Raw meat

In a study of asthmatic patients, 20% (children) and 8.6% (adults) were found to have IgE-mediated allergy to pork.

Allergen Exposure

Meat from swine.

30% of the meat is sold fresh, the rest is smoked, frozen, dried or pickled.

Test Details

Components:

Methodology: Immunoassay (IA)

Reference Range

< 0.35 KU/LTM

Container

Serum Separator Tube (SST)

Transport Temperature

Refrigerated

Specimen(s)

Serum

Specimen Stability

Refrigerated: 7 days

Frozen: 30 days

Reject Criteria

Days Performed

Mon-Sat

Collection Instructions

Separate serum from cells within 45 minutes of venipuncture.
